

RESTORATION DIVISION

Emergency Response, Repair & Reconstruction Specialists — Fire, Smoke, Water, Wind & Storm Damage

Building on Tradition. Building for the Future. Since 1979.

Overview

Banton was founded in 1979 and has earned a solid reputation as a leading emergency response, repair and reconstruction specialist.

Our restoration services are unique in that our firm has the solid backing of an established general contracting business. We stand ready when a difficult assignment calls for the strength that only a firm of our caliber can provide.

Banton's years of experience have proven to minimize the impact of any property emergency. Throughout our history, we have successfully supported a diverse range of clients – including homeowners, corporations, municipalities, state agencies, leading insurance companies and independent adjusting firms – all with unique and specialized needs.

Whether it is a residential or commercial property, Banton has the expertise to quickly mitigate damage, while providing clear and concise steps for the timely restoration of our client's property. As a result, we pride ourselves on giving property owners peace of mind during a time of turmoil.

OUR VISION. When an unexpected property emergency occurs, no one is prepared. When you work with Banton, you don't have to go through the process alone. We recognize that a loss to property is a complicated matter characterized by financial as well as emotional costs, and we work diligently to restore our client's property, as well as their quality of life and business operations, as quickly and efficiently as possible.

Expertise

My mother and I would like to thank the Banton team for doing such a wonderful job. Our project was a major undertaking – broken pipes flooded the house, causing a fire which destroyed the entire contents of our home. We were quite apprehensive about choosing the right company for the job, but Banton has proved to be the best. From the very start, they did everything with my mother's best interest in mind. Banton sent samples in a timely manner, responded to emails promptly and always sent updates to show us how things were progressing. Banton finished within the time frame they committed to and my mom is now back in her home and could not be happier. She and I love all that they have done and highly recommend Banton Construction to anyone."

Prompt and Effective Emergency Response

In the aftermath of an unexpected event, Banton is the only call our clients need to make. Our professional management team, experienced tradesmen and extensive vehicle fleet are available 24 hours a day. Our response teams will immediately and expertly mitigate the effects of fire, smoke, water, wind and storm damage.

Your Property is Our Property: Repair & Reconstruction Process

We understand that each project demands an immediate and detailed action plan. Our team of professionals will facilitate a seamless transition from the initial emergency response to the reconstruction of your property.

Once the property is secured, Banton's corporate headquarters comes into play, bringing over three decades of experience in estimation and restoration of property insurance claims.

Banton's team expertly guides our clients through every step of the reconstruction process. We treat each individual project as if it were our own property and carefully guide our clients so they can make effective decisions and realize their goals as quickly as possible.

Fair and Accurate Pricing

Banton realizes the importance of quick and accurate pricing. Our estimates reflect the timely blend of experience and technology, utilizing a highly advanced estimating system and state-of-the-art computer equipment. Our computerized price lists are continuously updated to meet the needs of fluctuating costs, specialty items and regional differences. Furthermore, our networking ability enables Banton to instantly call upon hundreds of qualified subcontractors throughout the region.

Banton stands apart from other firms because we perform a large percentage of each project with our own tradesmen and equipment. This practice directly benefits our clients because it allows us to maintain control over the quality, schedule and cost of each of our projects.
